

**Technical Charter (the “Charter”)
for
Duranta a Series of LF Projects, LLC**

Adopted April 23, 2026

This Charter sets forth the responsibilities and procedures for technical contribution to, and oversight of, the Duranta, which has been established as Duranta a Series of LF Projects, LLC (the “Project”). LF Projects, LLC (“LF Projects”) is a Delaware series limited liability company. All contributors (including committers, maintainers, and other technical positions) and other participants in the Project (collectively, “Collaborators”) must comply with the terms of this Charter.

1. Mission and Scope of the Project

- a. The mission of the Project is to develop a reference Radio Network stack including the required parts of the Radio Access Network (RAN) and the User Equipment (UE) software stack for research and testing use cases.
- b. The scope of the Project includes collaborative development of a RAN and UE Project and an Operations Project supporting the mission, including documentation, testing, integration and the creation of other artifacts that aid the development, deployment, operation or adoption of each project.

2. Technical Steering Committee

- a. The Technical Steering Committee (the “TSC”) will be responsible for all technical oversight of the Project.
- b. Composition
 - i. “Startup Period”: From the inception of the Project until such date as the TSC transitions to “Steady State” as described below, the TSC voting members shall consist of those committers of the Project identified in the CONTRIBUTING file within the Project’s code repository as the initial voting members of the TSC.
 - ii. “Steady State”: Within 24 months following the inception of the Project (or such other date as selected by the TSC), the TSC will transition to an alternate TSC composition model.

- c. At the inception of the project, the Committers of the Project will be as set forth within the “CONTRIBUTING” file. At any time the TSC may choose an alternative approach for determining the voting members of the TSC, and any such alternative approach will be documented in the CONTRIBUTING file. Any meetings of the Technical Steering Committee are intended to be open to the public, and can be conducted electronically, via teleconference, or in person.
- d. TSC projects generally will involve Contributors and Committers. The TSC may adopt or modify roles so long as the roles are documented in the CONTRIBUTING file. Unless otherwise documented:
 - i. Contributors include anyone in the technical community that contributes code, documentation, or other technical artifacts to the Project;
 - ii. Committers are Contributors who have earned the ability to modify (“commit”) source code, documentation or other technical artifacts in a project’s repository; and
 - iii. A Contributor may become a Committer by a majority approval of the existing Committers. A Committer may be removed by a majority approval of the other existing Committers.
- e. Participation in the Project through becoming a Contributor and Committer is open to anyone so long as they abide by the terms of this Charter.
- f. The TSC may (1) establish work flow procedures for the submission, approval, and closure/archiving of projects, (2) set requirements for the promotion of Contributors to Committer status, as applicable, and (3) amend, adjust, refine and/or eliminate the roles of Contributors, and Committers, and create new roles, and publicly document any TSC roles, as it sees fit.
- g. The TSC may elect a TSC Chair, who will preside over meetings of the TSC and will serve until their resignation or replacement by the TSC. The TSC Chair, or any other TSC member so designated by the TSC, will serve as the primary communication contact between the Project and LF Networking, a directed fund of The Linux Foundation.
- h. Responsibilities: The TSC will be responsible for all aspects of oversight relating to the Project, which may include:
 - i. coordinating the technical direction of the Project;
 - ii. approving project or system proposals (including, but not limited to, incubation, deprecation, and changes to a sub-project’s scope);
 - iii. organizing sub-projects and removing sub-projects;

- iv. creating sub-committees or working groups to focus on cross-project technical issues and requirements;
- v. appointing representatives to work with other open source or open standards communities or other collaborative communities;
- vi. establishing community norms, workflows, issuing releases, and security issue reporting policies;
- vii. approving and implementing policies and processes for contributing (to be published in the CONTRIBUTING file) and coordinating with the series manager of the Project (as provided for in the Series Agreement, the “Series Manager”) to resolve matters or concerns that may arise as set forth in Section 7 of this Charter;
- viii. discussions, seeking consensus, and where necessary, voting on technical matters relating to the code base that affect multiple projects; and
- ix. coordinating any marketing, events, or communications regarding the Project.

3. TSC Voting

- a. While the Project aims to operate as a consensus-based community, if any TSC decision requires a vote to move the Project forward, the voting members of the TSC will vote on a one vote per voting member basis.
- b. Quorum for TSC meetings requires at least fifty percent of all voting members of the TSC to be present. The TSC may continue to meet if quorum is not met but will be prevented from making any decisions at the meeting.
- c. Except as provided in Section 7.c. and 8.a, decisions by vote at a meeting require a majority vote of those in attendance, provided quorum is met. Decisions made by electronic vote without a meeting require a majority vote of all voting members of the TSC.
- d. In the event a vote cannot be resolved by the TSC, any voting member of the TSC may refer the matter to the Series Manager for assistance in reaching a resolution.

4. Compliance with Policies

- a. This Charter is subject to the Series Agreement for the Project and the Operating Agreement of LF Projects. Contributors will comply with the policies of LF Projects as may be adopted and amended by LF Projects, including, without limitation the policies listed at <https://lfprojects.org/policies/>.

- b. The TSC may adopt a code of conduct (“CoC”) for the Project, which is subject to approval by the Series Manager. In the event that a Project-specific CoC has not been approved, the LF Projects Code of Conduct listed at <https://lfprojects.org/policies> will apply for all Collaborators in the Project.
- c. When amending or adopting any policy applicable to the Project, LF Projects will publish such policy, as to be amended or adopted, on its web site at least 30 days prior to such policy taking effect; provided, however, that in the case of any amendment of the Trademark Policy or Terms of Use of LF Projects, any such amendment is effective upon publication on LF Project’s web site.
- d. All Collaborators must allow open participation from any individual or organization meeting the requirements for contributing under this Charter and any policies adopted for all Collaborators by the TSC, regardless of competitive interests. Put another way, the Project community must not seek to exclude any participant based on any criteria, requirement, or reason other than those that are reasonable and applied on a non-discriminatory basis to all Collaborators in the Project community.
- e. The Project will operate in a transparent, open, collaborative, and ethical manner at all times. The output of all Project discussions, proposals, timelines, decisions, and status should be made open and easily visible to all. Any potential violations of this requirement should be reported immediately to the Series Manager.

5. Community Assets

- a. LF Projects will hold title to all trade or service marks used by the Project (“Project Trademarks”), whether based on common law or registered rights. Project Trademarks will be transferred and assigned to LF Projects to hold on behalf of the Project. Any use of any Project Trademarks by Collaborators in the Project will be in accordance with the license from LF Projects and inure to the benefit of LF Projects.
- b. The Project will, as permitted and in accordance with such license from LF Projects, develop and own all Project GitHub and social media accounts, and domain name registrations created by the Project community.
- c. Under no circumstances will LF Projects be expected or required to undertake any action on behalf of the Project that is inconsistent with the tax-exempt status or purpose, as applicable, of the Joint Development Foundation or LF Projects, LLC.

6. General Rules and Operations.

- a. The Project will:
 - i. engage in the work of the Project in a professional manner consistent with maintaining a cohesive community, while also maintaining the goodwill

and esteem of LF Projects, Joint Development Foundation and other partner organizations in the open source community; and

- ii. respect the rights of all trademark owners, including any branding and trademark usage guidelines.

7. Intellectual Property Policy

- a. Collaborators acknowledge that the copyright in all new contributions will be retained by the copyright holder as independent works of authorship and that no contributor or copyright holder will be required to assign copyrights to the Project.
- b. Except as described in Section 7.c., all contributions to the Project are subject to the following:
 - i. The RAN and UE Project code directly instantiates Radio Access Network (RAN) components, entities, network functions, interfaces, data structures or any other technical functionality that are defined by industry standards organizations with a FRAND policy, such as but not limited to 3GPP and its partners, the O-RAN Alliance, or the Small Cell Forum. All new inbound code contributions to the RAN and UE Project must be made using (1) the Collaborative Standard Software License (“CSSL”) and (2) a CLA in the form approved by the TSC, and all outbound code of the RAN and UE Project will be made available under the CSSL.
 - ii. The Operations Project supplements the RAN and UE Project components with operational and management software, including orchestration and management, deployment, or other underlying cloud platform components based on open source software technologies. All new inbound code contributions to the Operations Project must be made using the MIT license, available at <https://opensource.org/license/mit> (the “Operations Project License”). All new inbound Operations Project code contributions must also be accompanied by a Developer Certificate of Origin (<http://developercertificate.org>) sign-off in the source code system. All outbound Operations Project code will be made available under the Operations Project License.
 - iii. Documentation will be received and made available by the Project under the Creative Commons Attribution 4.0 International License (available at <http://creativecommons.org/licenses/by/4.0/>).
- c. The TSC may approve the use of an alternative license or licenses for inbound or outbound contributions on an exception basis. To request an exception, please describe the contribution, the alternative open source license(s), and the justification for using an alternative open source license for the Project. License exceptions must be approved by a two-thirds vote of the entire TSC. The TSC must ensure that any inbound code or integration of Project code into Upstream

Projects, do not cause the Project code or parts thereof to become subject to licenses that are incompatible with the terms of the applicable license or the relevant CLA for previous contributions, and no additional obligations may be imposed on the Contributor. Furthermore, no Contributor is obligated to enter into a new or amended CLA. With regard to the granting of rights of use to Contributors' contributions, the CLA is the governing document and takes precedence over the Duranta Project Technical Charter in this regard. Therefore, the granting or implementation of alternative or new licenses for incoming or outbound contributions or for any code subject to this Charter shall only be effective if the Contributors grant the corresponding rights.

Any amendment or modification to this clause 7c requires the written consent of all contributors.

- d. Contributed files should contain license information, such as SPDX short form identifiers, indicating the open source license or licenses pertaining to the file.

8. Amendments

- a. This charter may be amended by a two-thirds vote of the entire TSC and is subject to approval by LF Projects, except that any modifications to Article 7 shall require a unanimous vote by all members of the TSC. Any such modifications to Article 7 shall be effective on a going forward basis and shall not create retroactive effect in connection with prior contributions without the prior written consent of the contributor. If changes in Section 7 regarding rights of use and their conditions refer to future or new contributions, they are subject to the contributors have granted the corresponding rights.
